A Basket of Pint Size (166)

As reported by the Small-Flowered Symposium Committee of the NORTH AMERICAN GLADIOLUS COUNCIL, in its report appearing in the December 1955 *NAGC Bulletin, PINT SIZE topped the list for EXHIBITION LAVENDERS and was chosen as one of the twenty best Small varieties. It is also a valuable decorative.

PINT SIZE and many other of the best small varieties are described in the Miniature and Small Variety Section of this catalog. They are fine for the show table and no other class of glads is better for arrangement, whether it be in competition or for the home and your own enjoyment. Give them your consideration.

* The NAGC Bulletin is published quarterly by the NORTH AMERICAN GLADIOLUS COUNCIL. A year's subscription to this wealth of gladiolus information can be yours by sending \$2.00 to the membership chairman, HENRY S. SENTMAN, 820 ½ Ontario Street, Havre de Grace, Maryland.

TO FRIENDS—OLD AND NEW

In presenting the 1956 edition of "Distinctive Glads," we regretfully announce the recent death of Everett A. Quackenbush, founder and senior partner of the firm.

My father's interest in glads dated back to the late twenties, when he raised a few as a hobby. Soon the hobby grew and finally expanded in 1935 to the commercial firm of "Distinctive Glads." He really enjoyed hybridizing and had planned to do more of it upon his retirement, in August 1954, from the Pennsylvania Department of Public Instruction. However ill health intervened and he was unable to continue.

Since my graduation from college in 1938, I have been his helper and finally his partner in the firm. His guidance and judgment will certainly be missed, but it will be my constant endeavor to maintain the high standards established by him in his many years of association with the gladiolus public.

Realizing that there is no substitute for quality, I will attempt to include only varieties of real merit and to send out stock which is as healthy as it is possible to produce.

Thank you for your past patronage and I hope that you may continue to favor us with your business.

Sincerely,

Everett F. Quackenbush

AN IMPORTANT ANNOUNCEMENT

This past spring the firm of "Distinctive Glads" acquired the business and complete stock of fine bulbs from E. Bane Snyder, Glad Gay Acres, Hagerstown, Maryland, who retired from the gladiolus business because of ill health. His DIXIE MAID, ELEVATION, MELLOW MOON, ANTIETAM and many other originations and seedlings were tops in our fields this past summer.

I assure you that the bulbs you buy from us this year, will also be up to his high standard of quality.

We welcome Mr. Snyder's friends and customers.

NEW INTRODUCTIONS

INTRODUCING THE GLADIOLUS WHICH WILL WIN THE HEARTS OF ALL AMERICA'S GLAD GROWERS THE NEW 1956 ALL-AMERICA SELECTIONS

ROYAL STEWART (450) (Plant Patent No. 1339)

AAGs

(Originator—Ralph J. Pommert)

(Parentage—Red Charm x Unnamed Seedling)

A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performances under an extensive test program throughout the United States and Canada. The lightly ruffled florets are five inches in diameter and are of exceptionally good substance. Color is a clear light red and the long flowerheads frequently carry twelve florets open at one time. Growth is most vigorous and healthy, with a nice uniform height of plants about five feet. On the occasions when it has been exhibited at gladiolus shows, Royal Stewart has proved to be an outstanding winner of Top Awards. We know you will like this one. It is truly a "royal" glad.

Illustrated in color on Front cover.

APPLEBLOSSOM (460) (Plant Patent pending)

AAGs

(Co-Originators R. Baerman, C. Fischer)

(Parentage—Beauty's Blush x Rose Charm)

A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to eight or ten trim florets, about five inches in diameter and of very heavy substance, are open at a time on spikes up to five feet tall. A vigorous, easy grower that performs excellently with only average culture. Appleblossom will give you a new conception of gladiolus beauty when it blooms in your garden. A few spikes of this beautiful glad, arranged with some fresh greens, is reminiscent of a beautiful Spring morning.
